

Steven G. Heinze

Baltimore, MD

Email: stevenheinze57@gmail.com

Website: <http://steven-g-heinze.com>

Education:

Self Taught (Fall 2017 - Present)

- Computer Science Programming

Towson University (Fall 2015 – Fall 2017)

- Bachelor's Degree Completed in Computer Science in Information Technology

Community College of Baltimore County (Fall 2013 – Spring 2015)

Skills:

Jenkins Pipelines and Openshift (Advanced)

- Individually created various Jenkins pipelines for automated build and deployment of applications to an Openshift (Kubernetes) Environment. This encompassed both Java and ASP.NET Core 2.2 applications.
- Contributed to a Jenkins Shared Library, Openshift build and deployment templates, and various other related technologies
- A variety of experience working with Openshift in both the UI and CLI to configure build images, routes, services, config-maps, deployments, and pods
- Ample experience debugging problems that encompassed both Jenkins pipelines and Openshift builds/deployments

Java Language (Intermediate)

- Spring Framework 5 Experience which includes but is not limited to Spring Boot Initializer, Spring Boot Actuator, Spring Data, and Spring MVC
- Experience with EJB and Java Servlets
- Experience utilizing Apache Maven
- Groovy Experience contributing to a Jenkins Shared Library

ASP.NET Core 2.1 (Intermediate)

- Experience completing basic level applications and also working with, debugging, and modifying various advanced level enterprise applications
- Currently creating a resume site with a .NET Core and SQL server backend
- Ample experience debugging .net core code and troubleshooting issues related to both building and deploying

Angular 2 (Basic - Intermediate)

- Created several different low-level Angular applications including a fully functioning Tic-Tac-Toe game involving dynamic player modifications and a competent AI
- Experience utilizing Sonar Lint to quality check Angular code
- Currently creating a resume site with an Angular 2 (Typescript) frontend

Ansible (Intermediate)

- Experience creating basic to intermediate Ansible scripts

Javascript / Typescript (Basic)

- Experience completing several low-level applications in plain Javascript and Typescript

Apache Web Server (Basic)

- Experience both installing and configuring multiple apache instances in a Linux environment

HTML and CSS (Intermediate)

Python (Basic)

Git and TFS (Basic)

Linux Command Line (Basic)

Vagrant (Basic)

Work Experience
